Thermo Scientific Heraeus Megafuge 11 Centrifuge

- **High capacity—process more samples in less time**
- **Patented AUTO-LOCK® rotor system allows rotor changes in just seconds**
- **Quick recall buttons for up to four programs**

These general-purpose centrifuges provide high capacity while taking up minimal lab space. Process up to sixty 5- or 7-mL tubes at a time to maximize your productivity. The patented AUTO-LOCK rotor system allows you to switch out rotors in just 5 seconds, allowing you to change test methods and protocols more easily. Easy rotor removal provides easier cleaning. Whisper quiet, brushless induction motor provides years of service with virtually no maintenance or distraction.

Easy-to-use control panel makes set-up and programming simple. Four quick recall keys provide easy recall of frequently used programs. Digital displays allow easy monitoring of speed, G-force, and timer. Refrigerated units also display temperature. Pre-cooling function (available on refrigerated units) allows you to pre-chill chamber and rotor to maintain temperature for your precious samples.

Choose from a wide range of rotors and buckets to meet your ever-changing needs.

Specifications

Max rpm	14,600
Max RCF	Swing-out: 3176 x g Fixed-angle: 23,113 x g
Power VAC	230
Dimensions	15-11/16"W x 14-19/32"H x 19-11/16"D

	(40 x 31 x 50 cm)
Max capacity	1.34 kg
Refrigerated	Yes
Variable speed	Yes
Speed control	Digital
Rotor included	No
Model	75004412
Type	Refrigerated
Temp range	-9°C to 40°C
Timer	30 seconds to 99 minutes
Temp control	Digital
Power Hz	50/60
Manufacturer number	75004412
Max RCF x g	23,113
